Live Batch 01: open for enrollment

FortiGate NSE 4

on FortiOS 7.6

Live with Radhe

Small batches

7 seats per batch, so every question gets answered in class.

English and Hindi

With every command and term in English.

A real firewall lab, in your browser

Hosted for you. No powerful PC needed.

Batch 01 started Mon 16 Nov 2026

10 live classes on Mondays and Wednesdays, 9:00–11:00 PM IST, to Wed 16 Dec 2026. Every class is recorded, so you can still join after it starts.

THE PACKAGE

What you get

10 live classes

2 hours each on Google Meet, with your questions answered as we build. Radhe teaches on the same lab design you use.

30 hours of hosted lab

On Ping My Lab's FortiGate, Linux hosts and Active Directory lab, in your browser. No 32 GB PC needed.

One lab for every class, with a drill

On one company network that grows class by class, with GUI paths and FortiOS CLI. Each lab ends in a Break it, fix it drill.

Challenge labs and interview Q&A

Nine job tickets with no steps, and a solution key.
111 interview questions with full answers.

Recordings and notes

A recording of every class and notes for every session. They stay on My courses for one year from the first class.

Exam prep, no dumps

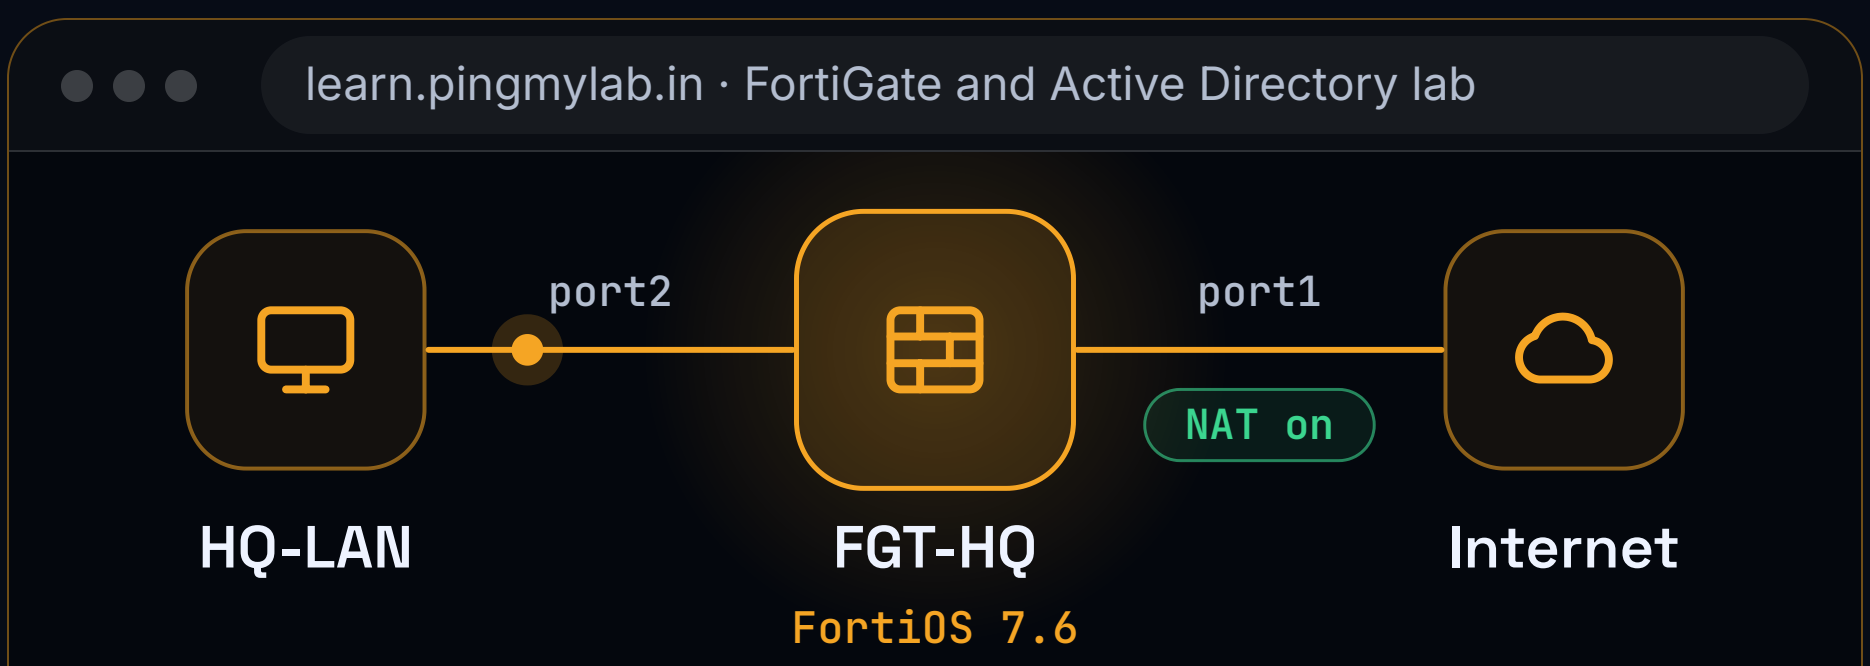

The NSE 4 objectives mapped to the labs, with a 55-question original practice test. No dumps, ever.

Free bonus: Firewall Foundations Bootcamp

Zero to Day 1: 11 modules, each with a hands-on Cisco Packet Tracer lab, and a 147-page lab guide.

THE LAB

Your FortiGate lab opens in a browser.

```
FGT-HQ # config firewall policy
    move 3 before 1
end
FGT-HQ #
```

Class 3 on the hosted lab. HQ-LAN reaches the Internet through FGT-HQ, port2 to port1 with NAT on: policy 1, LAN-to-Internet. After move 3 before 1, policy 3, Block-INET-TEST, is checked first and blocks the test host.

30 hours of lab time: enough to do every lab once and repeat the Break it, fix it drills.

Shown live on licensed FortiGates. HA clusters, branch and FortiClient VPNs, deep inspection and FortiGuard filtering, and FortiAnalyzer: what Fortinet’s free trial cannot do.

Want your own lab too? The Lab Setup Guide builds the same topology on EVE-NG, GNS3 or VMware Workstation, with Fortinet’s free FortiGate-VM trial.

THE PLAN

Class by class

Five chapters, two live classes each, on FortiOS 7.6. Covers all 18 tasks of the Fortinet NSE 4 - FortiOS 7.6 Administrator exam, then goes past it.

CHAPTER 1 Classes 1-2

Setup, routing and first policies

CLASS 1
Mon 16 Nov

First login, factory defaults, the free trial and registration, admin access, GUI and CLI, backup and restore, and the default route.

Lab: HQ's FortiGate, from factory defaults to a saved config

CLASS 2
Wed 18 Nov

A router joins the network: DHCP through a relay, static routes and the routing table, and the first firewall policies and logs.

Lab: a new router, DHCP relay and the first policies

CHAPTER 2 Classes 3-4

NAT, publishing and the Security Fabric

CLASS 3
Mon 23 Nov

A DMZ with a web server, how policies match, IP pools and source NAT.

Lab: a DMZ web server, and source NAT for HQ

CLASS 4
Wed 25 Nov

Publishing servers with VIPs and port forwarding, hairpin NAT and logs. FortiAnalyzer and the Security Fabric are shown live.

Lab: the DMZ web server, published with a VIP

THE PLAN, CONTINUED

Class by class

Every lab runs on one company network that grows class by class: two ISPs, a DMZ, branches in Pune and Delhi, and an attacker.

CHAPTER 3 Classes 5-6

Authentication and security profiles

CLASS 5
Mon 30 Nov

Users from Active Directory: LDAP, RADIUS, active and passive authentication, and FSSO.

Lab: HQ users signed in from Active Directory

CLASS 6
Wed 2 Dec

Certificates and SSL inspection, web filtering and DNS filtering.

Lab: SSL inspection, web and DNS filtering for HQ

CHAPTER 4 Classes 7-8

Threat protection, SD-WAN and HA

CLASS 7
Mon 7 Dec

Application control, antivirus and IPS against a real attack.

Lab: app control, antivirus and IPS that stop the attacker

CLASS 8
Wed 9 Dec

Two ISPs, ECMP and SD-WAN, with a link-failure drill. HA is shown live.

Lab: SD-WAN over two ISPs, through a link failure

Every chapter also has a challenge lab as homework and the interview questions for that chapter.

THE PLAN, CONTINUED

Class by class

CHAPTER 5 · Classes 9–10

VPN and troubleshooting

CLASS 9
Mon 14 Dec

IPsec to two branches, redundant tunnels and remote access.

Lab: IPsec from HQ to Pune and Delhi, and remote access

CLASS 10
Wed 16 Dec

The sniffer, debug flow and sessions, high CPU and memory. Cloud and FortiSASE walkthroughs.

Lab: a broken network, fixed with the sniffer and debug flow

After the last class: dynamic routing (RIP, OSPF, BGP), transparent mode, VDOMs and day-2 operations.

Capstone project: the Nimbus Retail network. Design it, build it in phases that fit the free trial, test it, hand it over and defend it in a viva.

Missed a class? Watch the recording on My courses, read that session's notes and paste the previous lab's end-state config from the lab files, and you're ready for the next one.

TIMINGS AND BATCH

When we meet

Monday and Wednesday, 9:00 to 11:00 PM IST, from **Mon 16 Nov** to **Wed 16 Dec 2026**: 10 live classes of 2 hours on Google Meet.

EVENING CLASS

9:00–11:00 PM IST

Saudi Arabia, Qatar, Kuwait and Bahrain	**6:30–8:30 PM**
UAE and Oman	**7:30–9:30 PM**

November 2026

M	T	W	T	F	S	S
						1
2	3	4	5	6	7	8
9	10	11	12	13	14	15
16	17	18	19	20	21	22
23	24	25	26	27	28	29
30						

December 2026

	1	2	3	4	5	6
7	8	9	10	11	12	13
14	15	16	17	18	19	20
21	22	23	24	25	26	27
28	29	30	31			

Class dates: 16, 18, 23, 25 and 30 Nov; 2, 7, 9, 14 and 16 Dec

Batch 01 started on Mon 16 Nov. Every class is recorded, so you can still join after it starts. **FortiGate Batch 02:** dates not announced yet, and its waitlist is open.

WHO IT IS FOR

Is this for you?

A good fit if you

- Run FortiGate firewalls at work, or are about to.
- Know Palo Alto, Cisco ASA or FTD and want FortiGate as well.
- Are CCNA-level and want a firewall role, ready for hands-on work.
- Are preparing for the Fortinet NSE 4 - FortiOS 7.6 Administrator exam.

You will need

- CCNA-level networking: IP addressing and subnetting, routing, VLANs, NAT, TCP and UDP ports. No Fortinet experience needed.
- A Windows or macOS laptop with a modern browser and a stable connection. No powerful PC; the lab is hosted.
- A free FortiCloud account in your own name.
- Time for the labs between classes.

Not for you if

- You have never set up a router or a switch yet. Start with our free CCNA 2.0 course on pingmylab.in, then come back.
- You cannot give the class times and the lab time.
- You want exam dumps, or a certificate without the lab work.

Want to try it first? Start free with our FortiGate NSE 4 Free Edition on pingmylab.in: 13 hands-on lessons, in English.

CLEAR TERMS, BEFORE YOU PAY

Fees and the combo offer

FEE AND OFFERS

Message Radhe on WhatsApp for the fee and the Palo Alto + FortiGate combo.

The combo: FortiGate Batch 01 is on Mondays and Wednesdays at 9:00 PM IST, Palo Alto Batch 02 on Saturdays and Sundays at 11:00 AM IST, so the class times never clash.

How you join Batch 01

1. Message Radhe on WhatsApp, or leave your details on the batch page. He tells you the fee and holds a seat for you.
2. He sends you a personal payment link, on WhatsApp or by email. You pay through Razorpay’s secure checkout.
3. You land on My courses straight away, with your class schedule in IST and the Google Meet link to join.
4. The course kit and every recording so far are there, and you join the private WhatsApp group for Batch 01.

- No refunds after you pay: try it first with the course tour and a chat with Radhe.
- Recordings and the course kit stay on My courses for one year from the first class.
- Not included: Fortinet exam vouchers, and FortiGate-VM licences beyond Fortinet’s free trial if you build your own lab.
- No promise of a job or an exam pass: you get the labs, the interview Q&A and the exam prep. The practice is yours.

YOUR INSTRUCTOR

About Radhe

Founder, Ping My Lab

Not just a trainer. A practitioner.

> I have spent years working hands-on in enterprise networking and security — designing, deploying, and troubleshooting the same technologies I teach here at Ping My Lab. Not from a book. From production environments where things break and have to be fixed.

Configure it. Break it. Fix it. You configure FortiGate in Ping My Lab's hosted lab, break it and fix it. Every course has the same four pillars: guided lab sessions, challenge labs, complete notes and interview Q&A, demonstrated on real equipment.

FortiOS · PAN-OS · Cisco IOS/IOS-XE · ASA / FTD · Cisco ISE · EVE-NG · BGP / OSPF / EIGRP · MPLS / VPN
